A History to Celebrate

Leadership

Diversity

Responsiveness

Dependability

Since 1918, Lee Spring has been manufacturing stock and custom springs, formed metal parts and related products for a wide variety of industries.

Our company began in New York, still home to the Lee Spring Global Headquarters, and has since expanded with strategic locations throughout the United States, Europe, Latin America and Asia.

Today, the Lee Spring brand sets the Gold Standard for excellence through bold product innovations, quality manufacturing and responsive customer care.

1918 - United States

- Lee Spring founded in Brooklyn, NY by Robert Lee Johannsen.

1978 - United Kingdom

- Lee Spring Limited opens near London, servicing customers in Europe, Africa and the Middle East.

2003 - Mexico

- Lee Spring de México opens in Monterrey, servicing customers in Mexico and Latin America.

2008 - China

- Lee Spring China opens, servicing customers in China, Asia and the Pacific Rim.

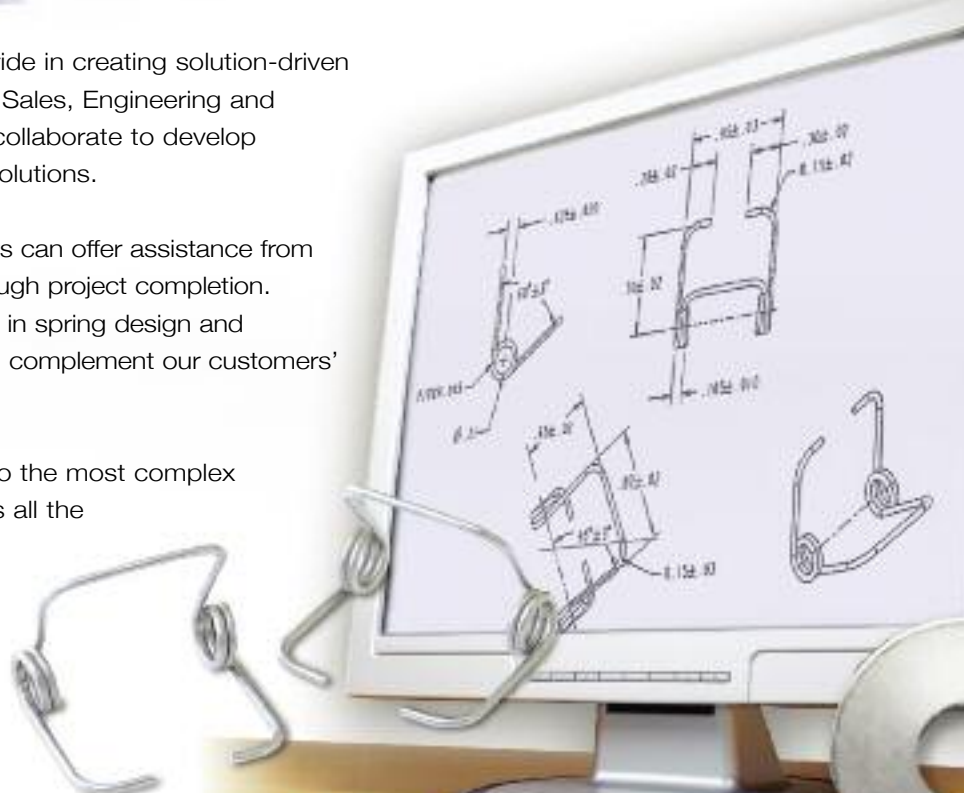

The Knowledge to Respond Creatively

Lee Spring takes pride in creating solution-driven responses. Our expert Sales, Engineering and Manufacturing Teams collaborate to develop application specific resolutions.

Lee Spring engineers can offer assistance from design conception through project completion. Our extensive expertise in spring design and mechanical engineering complement our customers' design teams.

From the simplest to the most complex project, Lee Spring has all the necessary resources.

Products to Meet Every Specification and Application

Lee Spring offers a wide range of Stock and Custom products, including:

- LeeP™ Plastic Springs
- Compression Springs
- Wave Springs
- Extension Springs
- Torsion Springs
- Die Springs
- Belleville Washers
- Battery Springs
- Constant Force Springs
- MIL-SPEC Springs

Our products are available in a wide range of materials, in inch and metric designs. The Lee Spring print and online catalog features over 21,000 quality items, augmented by our extensive custom capabilities.

Lee Spring products play critical roles in the design and manufacture of a wide variety of industrial, commercial and consumer products including:

- | | | |
|----------------------|---------------------|---------------------|
| • Intravenous Valves | • Clutches | • Regulators |
| • Peristaltic Pumps | • Windshield Wipers | • Sensors |
| • Seatbelts | • Printing Presses | • Counters |
| • Bicycles | • Conveyors | • Industrial Robots |
| • Strollers | • Capacitors | • Mobile Phones |
| • Wheelchairs | • Switches | • Fitness Equipment |
| • Motors | • Actuators | • Die Presses |

Lee Spring is ISO 9001 certified.

All Stock products with the exception of Cadmium Plated MIL-SPEC are RoHS and REACH compliant.

Service Without Limits

Our people are the core of our operations.

Lee Spring's Customer Service Team sets the standard for dedication. We strive to understand your needs so we can work with you to translate them into solutions. Assisting customers must surpass any boundaries of time and place.

No matter how small the request or how large the order, every customer is important and every person receives our full attention.

Lee Spring's Manufacturing Team fulfills your needs with precision and accuracy. Whether we are making a spring or packing an order, we are committed to manufacturing excellence and to delivering your order on your time, anywhere in the world.

Global Flexibility

Our expanding global presence and in-depth knowledge of the worldwide marketplace puts Lee Spring at the leading edge of creating market-specific solutions for customers' needs.

With steady focus and rigorous attention to details, Lee Spring partners with you to find a resolution that meets local, regional, and geographic requirements.

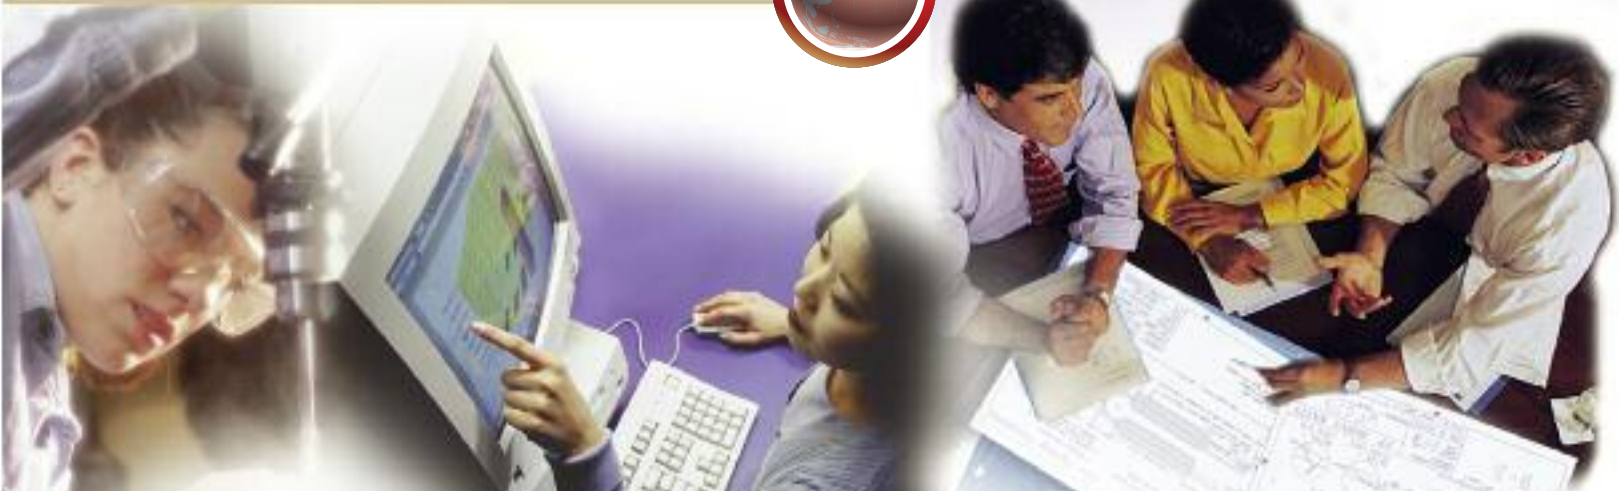

Serving Industries Worldwide

Lee Spring is your global source for stock springs, custom springs and formed wire products.

Our products serve a broad base of international industries including:

- Aerospace
- Transportation
- Valves and Pumps
- Robotics and Automation
- Instrumentation and Controls
- Industrial and Manufacturing Equipment
- Computer and Telecommunications
- Pharmaceutical Delivery Systems
- Medical, Dental and Veterinary Devices
- Sporting Goods and Toys
- Stamping and Machining
- Tools and Hardware
- Defense and Munitions
